

What do I need to know about Fall Guys?

Fall Guys is a platform-based battle royale style game where up to 60 players at any one time compete in matches, to get to the next round you must qualify in randomly selected mini-games. The emphasis is on good gameplay rather than violence or such other competition and you may find a resemblance between the Among Us characters and these "Fall Guy" characters.

11 Million Monthly Active Users

Release Date: 2020

Revenue model: In-Game Purchases including a "season pass"

Available on almost all platforms

The game is free to play on console and other devices, but it does have in-app purchases.

Each match has rounds, to progress you must complete mini-games and score within a certain rank. If you fail, you're out of the game. It's friendly competition, often without any direct competition.

Positive Points

1. Easy to use gameplay and style for its users.
2. Simple reporting system within the game, as well as the console offers a good deal of protection to block players who have a negative experience of.

Negative Points

1. This game is Online only, meaning you cannot play it single player, on some platforms there are chat options available also.
2. There is a season pass, which is paid for "subscription" to the game to get better perks and items within the game. This is a very common model within games to make revenue.

Parent Opinion: (of a 5 year old)

Fall Guys is really fun. It got popular really fast, and it makes sense why. The player must complete obstacle courses, survival games, and team games as jelly beans in costumes. It's hilarious. Cons: Frustrating. Some maps are unfair and the gameplay is still a little buggy of course, like any other 2015-2020ish game, it has a Battle Pass.
